Receipt of a 2007 NSF Louis Stokes Alliance for Minority Participation Grant

The Virginia–North Carolina Alliance for Minority Participation
Led by the U.Va. Office for Diversity and Equity and the U.Va. Center for Diversity in Engineering

AWARDED BY
The National Science Foundation

To broaden participation of underrepresented populations in the science, technology, engineering and mathematics disciplines and workforce
The Virginia–North Carolina Alliance for Minority Participation  

The Virginia–North Carolina Alliance for Minority Participation (VA-NC AMP) is a public-private institutional partnership dedicated to broadening participation of underrepresented populations in the science, technology, engineering and mathematics (STEM) disciplines and workforce. Supported by a $5 million grant from the National Science Foundation’s Louis Stokes Alliance for Minority Participation Program, the VA-NC AMP is led by the University of Virginia and also includes the Bennett College for Women, Elizabeth City State University, George Mason University, Johnson C. Smith University, St. Augustine’s College, Virginia Commonwealth University and Virginia Polytechnic Institute and State University.

The primary objective of the VA-NC AMP is to double the number of baccalaureate degrees in the STEM fields awarded to students from underrepresented populations by the end of 2012 through a wide range of programmatic initiatives.

Leading this initiative are William B. Harvey and Marcus L. Martin of the U.Va. Office for Diversity and Equity as well as Carolyn Vallas and Nicholas J. Garber of the U.Va. School of Engineering and Applied Science.
